

ILHAM- EC Project
***Interuniversity Learning in Higher Education on
Advanced land Management
Egyptian Country***

Duration: October 15, 2015 – October 14, 2018

ILHAM-EC aims at increasing the professionalism of young students by supporting the development of a new inter-university postgraduate Master on Sustainable Land Management (SLM) based on new innovative learning methods and adjusted to the Bologna process requirements.

Partners

Desertification Research Centre - University of Sassari
University of Leeds
Aristotle University of Thessaloniki
Mediterranean Universities Union
Advanced Computer Systems A.C.S. S.p.A.
University of Cairo
Alexandria University, Faculty of Agriculture
Damanhour University, Institute of Graduate Studies and Environmental Research
Zagazig University

The overall objective of the project is to contribute at the enhancement of capacity building in Higher Education of Egypt ensuring high quality educational curricula that meet professional, employer and socio-economic needs of the Partner Country.

The project will focus on the update of Master curricula taking into account new approaches to tackle land degradation and desertification processes.

The new Master will be designed to be student-oriented, based on new innovative learning methods to improve the quality of teaching and learning at the Universities of Cairo, Alexandria, Zagazig and Damanhour in line with the Bologna requirements and the Europe 2020 Strategy while building a multi-stakeholder collaborative and international educational network on Sustainable Land Management, thus creating new cooperative opportunities and relationships.
